

Heard, but not EXPOSED!

Have you ever had to endure commentating, judging, co-ordinating or keeping the scores running for fairs, carnivals or sporting events... and ... your notes are blowing away in the wind the rain is spoiling everything or you are turning into a lobster under the sun.

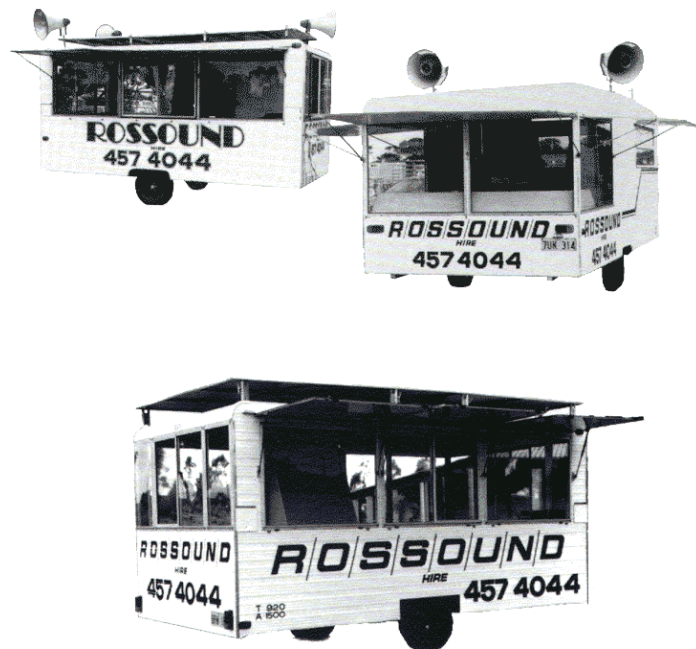

If ... you were slightly elevated above everyone so that you had better vision, you had wide spacious benches on which to work and keep your notes, you were totally protected from the wind or rain or sun, and you had very large panoramic windows through which you could comfortably view the events taking place

- Would you be more comfortable and be able to do your job better?

ROSSOUND HIRE has available, to you, Australia's most comprehensive and modern fleet of specialist designed studio and observation caravans. All our caravans feature large panoramic windows; all opening windows have flywire screens, carpeted floors, and large awnings to protect you from the direct sun, large expansive work areas and at least three comfortable poly chairs. Our Sports Observation caravans also have a large angled master score sheet area, tropical roof with a cool breezeway and fully adjustable horizontal blinds to each end of the caravans and enough room to seat six people side by side. Our exclusive fleet of caravans are always presented to you in a very clean and well-maintained manner

As Western Australia's premier, specialist provider of sound systems for all manner of outdoor social and sporting events we complement our caravan fleet with a comprehensive range of sound systems. Our caravans have even been design to have speaker horns fitted to the roof,

Please call us, here, at ROSSOUND HIRE, so that we can discuss with you what you expect from a paging and public address system together with a Studio or Observation Caravan, so that we can design a system tailored to meet your exact needs.
